

Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID19446
Project Name	Data Analytics for DHL Logistics Facilities
Maximum Marks	4 Marks

Solution Architecture:-

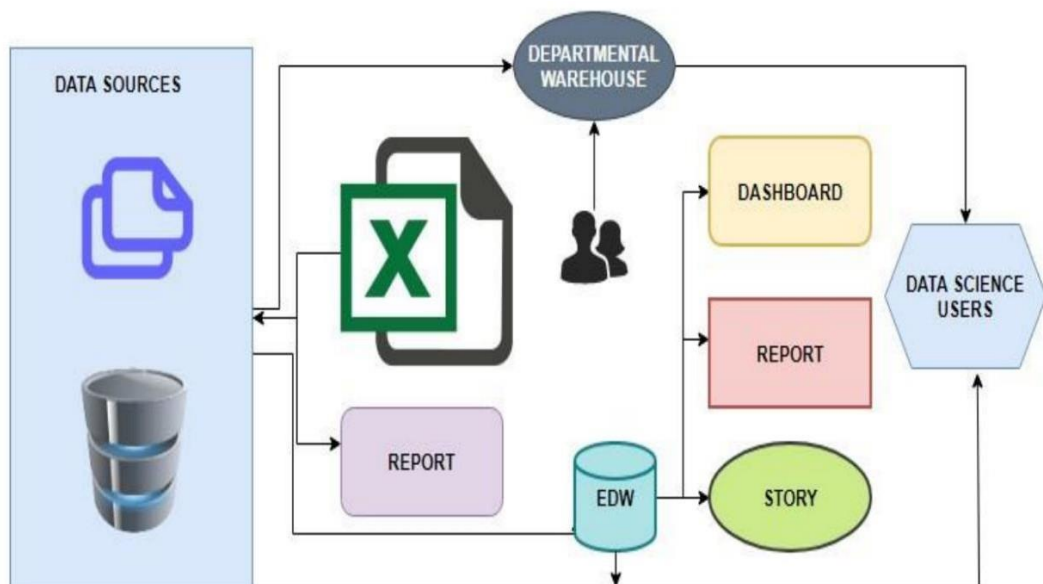

Solution architecture is a complex process with many sub-processes that bridges the gap between business problems and technology solutions.

Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
